

# Lifetime BIFOLD UNITS

## FLUSH OR PANEL

**1 UNFINISHED**   **2 PRIMED**   **3 PREFINISHED**

### REVERSIBLE UNIT

All Lifetime standard flush units have reversible machining. This allows suspension of either end of the bifold unit from the 1 pc overhead track, thereby permitting grain selection preference. Also enables the units to fold either left or right, resulting in maximum installation flexibility and simplicity! **OPTIONAL** Two 2-dr units may be paired together to enable conversion into a 4-dr center opening unit.

### HARDWARE Stanley

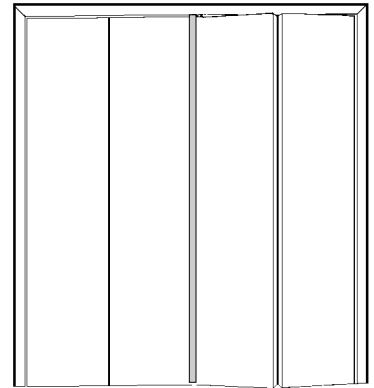

Only the finest hardware is used on Lifetime bifold units to assure "whisper quiet" chatter-free operation. The durable steel top track eliminates using a "dirt catching" bottom track and eliminates bottom track jumping. Positive aligners prevent jarring when closing. Snugger springs hold independently, allowing the other half of a 4-door unit to remain stationary. Fully adjustable hardware permits post installation adjustments. Quality concave knobs enhance the appearance of each unit. Other hardware brands available on request.

### PACKAGING

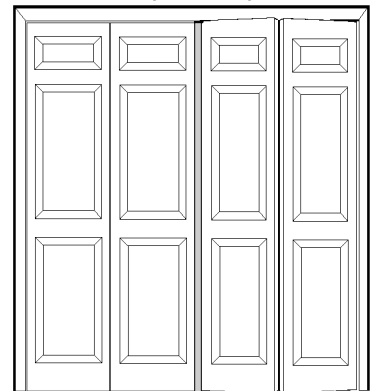

All bifolds are enclosed in C-Thru Vinyl Bags or may be optionally had in White Cartons, attractively designed to appeal to the Retail DO-IT-YOURSELF buyer.

### AVAILABLE SIZES THICKNESS: 1-1/8" or 1-3/8"

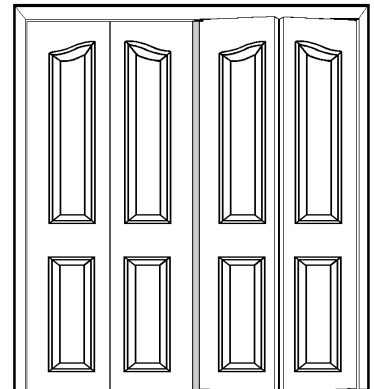

Widths				Lengths		
2 Door Opening		4 Door Opening		Size	Unit Height	Required Finished Opening

Heavy duty steel track with pivot bracket. Prefinished faces beautify and modernize each installation. Does not require concealing header moulding.

Snugger snaps into track to keep doors "snug" in closed position.

Top pivot/guide for quick and easy door installation.

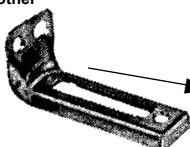

Attractive concave door knobs add a finished touch.

Aligners for use in four door applications. Keeps lead doors aligned when closed.

Easy adjusting horizontal jamb bracket makes pivot installation a snap. Gives smoother operation than ever before.

Bottom pivot with adjusting threaded bolt for quick vertical alignment. Holds secure.

### SHORT FORM SPECIFICATIONS

All bifolds are to be of wood (hardboard) secured by a top track of vinyl coated steel, without a bottom track; as manufactured by Lifetime Doors, Inc.
